

2640 ROMANA SMALL EXTENDING DINING TABLE

This stylish oak dining table features a beautiful curved edge detail to the long sides of the table top which combines with the curves and chamfers of the legs to give an organic feel to the piece. The table features a reciprocating mechanism pull on one end to extend and the other end opens at the same time. The extension leaf is stored within the table as a butterfly mechanism it is simply flipped open into place. This dining table seats four when closed and six when extended. It is finished in a clear matt lacquer that protects the timber at the same time as showing off the natural beauty of the oak.
