## 3270 ENNA UPHOLSTERY

---

Thank you for purchasing this Enna upholstery. Please ensure instructions are read in full before attempting to assemble this product.

---

### PREPARATION

This is a two person operation

---

Please check the pack contents before attempting to assemble this product. A full checklist of components is given in this leaflet. If any components are missing, please contact the retailer from whom you bought this product.

This product is **HEAVY**, it should be assembled as near as possible to the point of use.

**TAKE CARE WHEN LIFTING** to avoid personal injury and (or) damage to the product.

The fittings pack contains may contain **SMALL ITEMS** which should be **KEPT AWAY FROM YOUNG CHILDREN**.

Read this leaflet in full before commencing assembly.

---

## Fittings and parts checklist

---

A	For all Large sofas: Centre foot x 1	
---	--------------------------------------	---

---

## Step by step assembly instructions

---

1. Carefully lie the sofa on its back on a clean, soft surface; this is a two person operation.
2. Screw the centre foot into the insert on the underside of the sofa, as labelled in the diagram.

3. Once the foot is fitted, the sofa can be lifted upright and position into place; This is a two person operation, do not pivot it on two legs.

# Customer Care

## Wood Furniture

Wood displays different grain patterns depending on which way it is cut - for example, the 'medullary ray' which can appear on oak furniture is a mark of good quality timber - these are characteristics of the natural beauty of the wood. All timber surfaces will change colour and mellow over time. New furniture will initially vary in shade from items that have been previously purchased.

## How to care for your wood furniture

Furniture with a hard lacquer, wax polish or painted surface should be dusted with a dry cloth. When using the surface for serving food and drinks it is best to use protective mats and coasters. Spillages should be wiped up as soon as possible. Spray polishes should be avoided as they can contain silicones which may spoil the furniture's surface by building up over time. Use of cleaning materials containing abrasive compounds, acidic or caustic reagents and any bleaches containing oxidising reagents should be avoided as prolonged use may damage the lacquer surface. If sticky marks occur on the surface they can be removed with a dilute solution of warm soapy water. The area should be rubbed lightly and then completely dried immediately afterwards, before replacing any mats etc. Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by central heating can cause damage, such as warping.

## Safety Instructions

Never drag furniture when moving it, always lift it. Take care when handling or moving the furniture as careless handling may cause damage or injury. No liability will be accepted for damage or injury caused by incorrectly installed furniture.

## Fabric Care

Every effort is made to keep colours consistent between batches, but fabric manufacturers cannot guarantee exact matching. All fabrics will fade in sunlight, to prolong the life of the fabric do not place it close to a heat source or in direct sunlight. Plump up cushions after use, especially fibre or feather cushions. If the cushions are reversible turn them at least once a week to minimise wear and maintain their appearance. To prevent dust and dirt accelerating wear, gently vacuum upholstery once a week or use a soft brush. For complete cleaning we recommend a specialist cleaning in situ. Accidental spills and stains should be treated as soon as possible, except mud which should be left to dry and then brushed off. Remove any solids, then blot up as much liquid as possible with white paper towel or a clean cloth. We recommend professional dry cleaning but some action can limit damage.

## Leather Care

As leather is a natural product, each hide will have its own individual characteristics - grain pattern, texture and colour will vary from hide to hide and even within the same hide. All of which contribute to the natural beauty and softness of the hides. Keep your leather furniture at least 40cm away from any heat source and if possible avoid exposure to direct sunlight preventing colour fading, dehydration and cracks. Leather furniture in a normal domestic environment should require little attention. Cleaning should only be done when necessary. We advise that the leather should be regularly dusted. At least twice a year the surface should be wiped over with a damp cloth, with special attention paid to crevices where dust and dirt could be a cause of hidden wear. Do not apply any chemical or abrasive products. If you have a spillage on your leather furniture, act immediately and dab off any excess liquids and solids, then contact a specialist leather cleaning company.

## **Important Information - Read carefully and retain for future reference:**

- a) Maximum load for safe operation of the chair is 110kg.
- b) If this is a large sofa, the centre leg must be attached as per the instructions before use.
- c) Please ensure the instructions provided have been read and clearly understood before use.
